Data Cleaning with R (Pre-Assessment)

B *I* U

Take this pre-assessment before you go through the Data Cleaning with R presentation. Do your best, and don't worry about guessing or wrong answers. The purpose of the pre-assessment is to help you measure growth; you'll answer the same questions again after the presentation.

What best describes R? *

- A scripting program and the software to run those scripts
- A spreadsheet tool for data-cleaning
- A database tool for graph and chart-making
- An open-source data cleaning tool

Which of the following do you NOT need to do to set up a new project in R-Studio? *

- Set a directory for R-Studio to save your files
- Set a language for the program to use
- Create a new script file
- Import your data into the directory
